Creating Panoramas

The YOUBIQ App uses the gyroscope in the iPhone 4 to guide you through the process of capturing the images you need to create a panorama. The YOUBIQ Cloud then stitches them together into a single image and copies it back to your iPhone 4.

Image processing with the YOUBIQ Cloud will be updated to include HDR, color correction, and other features. This eliminates the need for you to acquire larger, more complex Apps on your iPhone 4 or your computer. With the YOUBIQ Cloud, you can re-process your images anytime using the latest technology available.

YOUBIQ App & Cloud

Capturing photos and videos with the YOUBIQ™ Gymbi and App helps you create the sharpest imagery possible on an iPhone 4. The YOUBIQ App is always connected to the YOUBIQ Cloud, synchronizing your photos and videos in the background as you shoot.

Download the YOUBIQ App at
www.YOUBIQ.com

The YOUBIQ App also activates state-of-the-art services in the YOUBIQ Cloud including sharing, organization, image processing, tagging, and much more. The YOUBIQ Cloud is private and secure. You control what, where, and how your media is shared.
